(b) if so, what are the details thereof; and

(c) what is Government's reaction in regard thereto and the steps Government are taking for the early production of electric locos by Chittranjan Locomotive Works?

THE MINISTER OF STATE OF THE MINISTRY OF RAILWAYS (SHRI MADHAVRAO SCINDIA): (a) Yes, Sir.

(b) and (c) The electric locomotives being manufactured at Chittaranjan Locomotive Works at present are of 3900 horse power. To update technology and uprate horse power 18 prototype electric locomotives of three types of 6000 horse power each have already been ordered and are expected to be received in 1988. Thereafter, tests and service trials for evaluation and selection of the most suitable type will be conducted.

As regards development of another family of electric locomotives with an intermediate horse power is concerned, the broad conceptual frame work for a 5000 horse power electric locomotive had been suggested by Chittaranjan Locomotive Works but this concept has not been concretised to the extent of final detailed design drawings or of inclusion in Chittaranjan Locomotive Works's production plan. The technical implications of such steps are constantly under review in the light of the latest development in technology and the time frame involved in the materialisation of the various options. For early production of electric locomotives by Chittaranjan Locomotive Works, capacity at their works is being increased progressively from 60 to 100 annually by 1988-89 in two phases.
